Seongyup,

The attached PDF contains the table you requested regarding the figures in Appendix 1 and the enabling conditions of CBI / Ex. 4 listed in Section 1. There are also DTCs that can also disable CBI / Ex. 4 when a fault is detected, but they were not included here since the question only referred to the entry/exit and enable conditions from the AECD document.

Thanks  
Bob Vito

**Subject:** [EXTERNAL] CBI / Ex. 4 in HGMXV01.6356 AECD

Hi Bob,

There are some figures in Appendix 1 that seem to describe enabling conditions of CBI / Ex. 4 listed in Section 1 (page 3). But, it's difficult to understand entry/exit conditions or enable criteria by the figures so can you summarize the entry/exit conditions or enable criteria in a table? In the summary, please mention whether all criteria should be met or not in order to activate the CBI / Ex. 4

Thanks,  
Seongyup
